

To Whom it May Concern:

I am a satisfied user of XM radio. I have become more satisfied recently as XM has added a traffic report channel specific to the region I live, Los Angeles. As anyone knows, LA is notorious for its traffic. I am in sales and time is money. With the XM traffic station, it is constantly providing me traffic updates ... constantly. No other station does that. PLEASE do not get rid of local content on XM radio. Allow XM to FREELY compete with other radio stations and likewise. That is what capitalism is all about.

Thanks for listening to my comments.
